FOR SUSTAINABLE
INTERIOR DESIGN
#BIOPHILICDESIGN

Who we are & what we stand for ...

 Our goal: We bring **real nature into the interior** and increase the **quality of life and living**.

- Austrian company with headquarters and production in the heart of the Alps
- unique surfaces worldwide
- careful and climate-neutral produced in Tyrol
- Company location Fließ/Tyrol 1.200 m² area
- growth 2021 +26%
- founded 2012

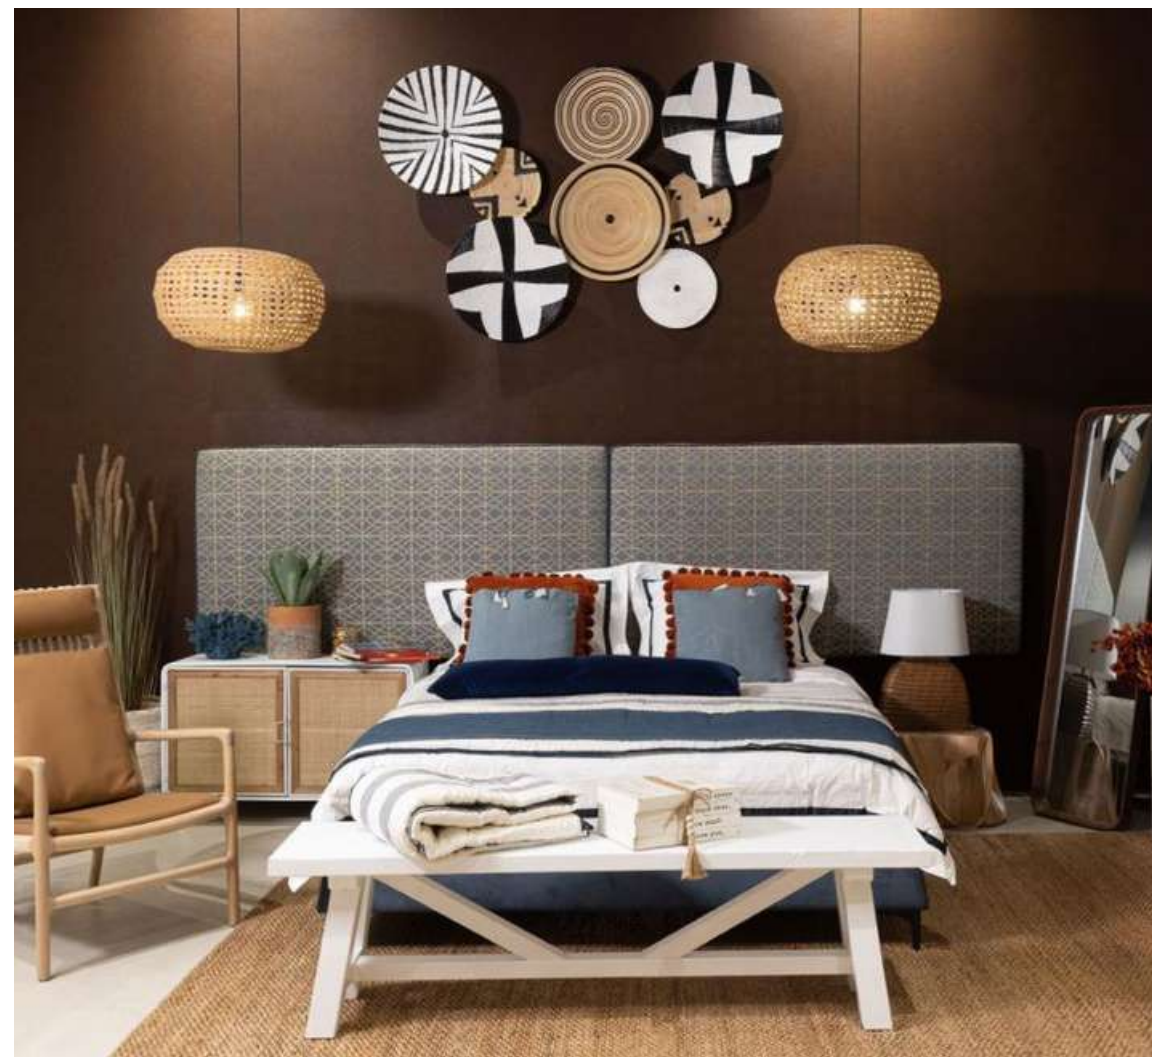

”

The increasing urbanization and uprooting of mankind demand a timely response with new, natural room design concepts: Organoid® natural surfaces.

Christoph Egger, Founder & CEO

Biophilic design

Organoid in the interior for a natural feel-good atmosphere

Our vision

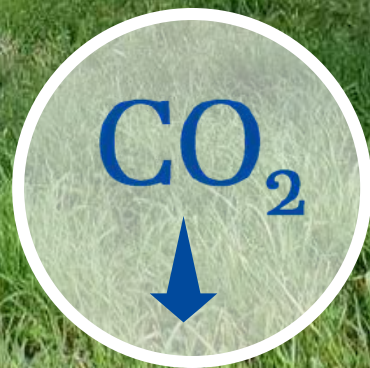

The present time is increasingly technological and fast-moving and unpredictable.

We want people to have a chance to get **back to nature** and to strengthen this important connection.

This happens in natural surroundings, and now it can also happen indoors when our **natural surfaces** are used with your design.

upcycling

neutral

We protect what we love

- Certified climate-neutral company & climate-neutral products since 2015
- Support climate project Karwendel Nature Park
- electrified vehicle fleet
- regional supply chains as far as possible
- natural raw materials
- upcycling, e.g. with spelt, moss & coffee
- use of 100% natural flax fleece & recycled eco-fleece as backing material

Our competence

We use natural **raw materials** and process them into decorative elements for **interior design** in a careful and worldwide **unique production process**.

Our product range includes **wallpapers, panels for the carpenter, floor panels** as well as **acoustic products**.

Our product range extends from **wallpapers, panels, adhesive foils and floor panels** to **acoustic products** and design elements.

The special: Our untreated natural surfaces can be...

see.

feel.

smell & ...

The road to a natural surface

real natural material

e.g. alpine hay
from regional farmers

backings

for different applications

climate-neutral production

made with love in Tyrol

Einleitung

”

During the concept phase, I did a little research on Pinterest about mood images for our foyer. When I came across Organoid, I knew that this was exactly what we wanted. We couldn't have found more thematically appropriate surfaces for the walls in our foyer. Our visitors also look closely and are interested to see which plants have been used here.

Nature is the best designer.

Valuable raw materials

Nature grants us everything we need to create our authentic **natural surfaces**:

- alpine hay
- rose petals
- moss
- cornflowers
- sunflower seeds
- lavender
- coloured petals
- coffee beans
- and many more

Optics,
haptics &
scent
remain
intact

A scenic view of a mountain lake. The water is a deep blue, reflecting the sky and the surrounding mountains. The lake is nestled between steep, rocky slopes covered in green vegetation. In the foreground, there are rocks and patches of moss, with some small white and yellow flowers. The text "Nature inspired." is overlaid in the center of the image.

Nature inspired.

”

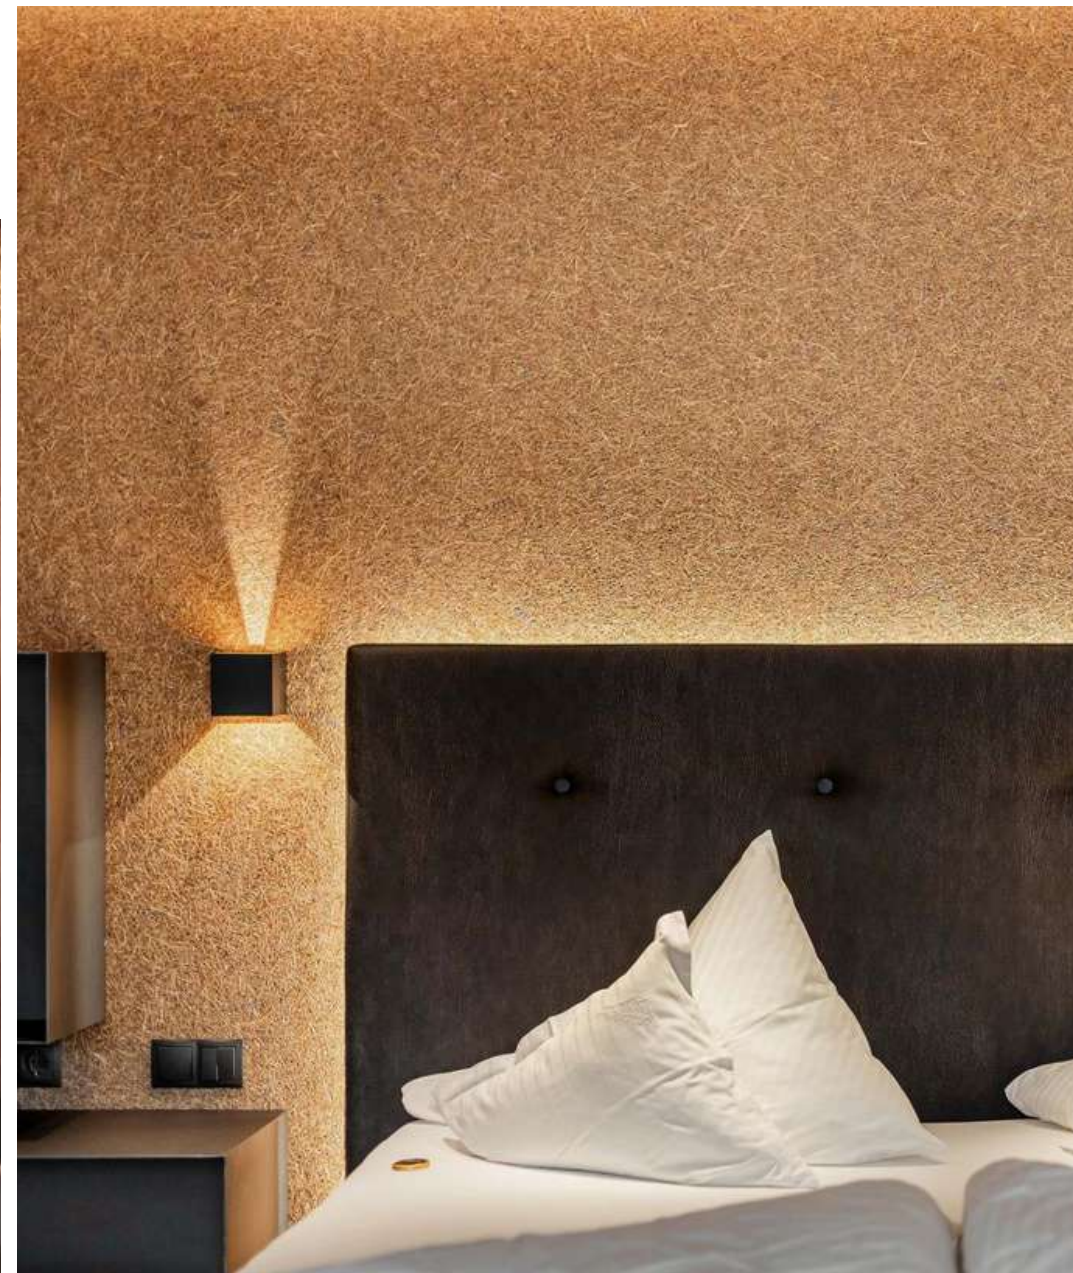

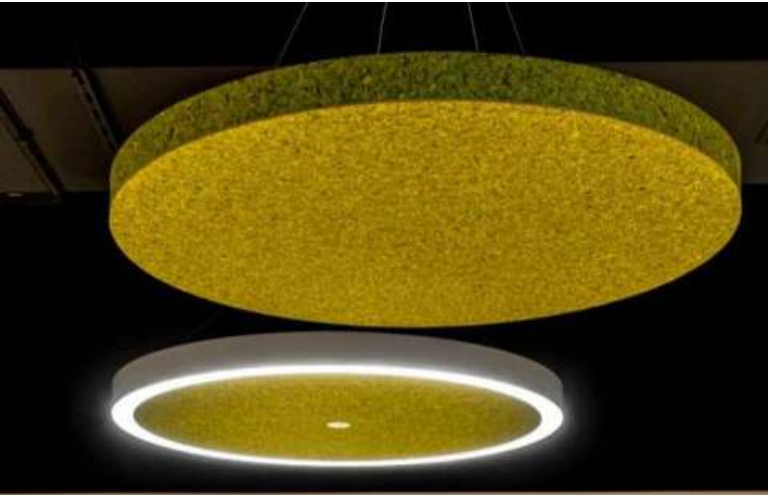

Integrating natural elements into the spaces where we work, live and relax is more in demand than ever.

Through the targeted use of Organoid® in the interior design, people feel less stress, are more productive and happier.

Florian Föger, CEO

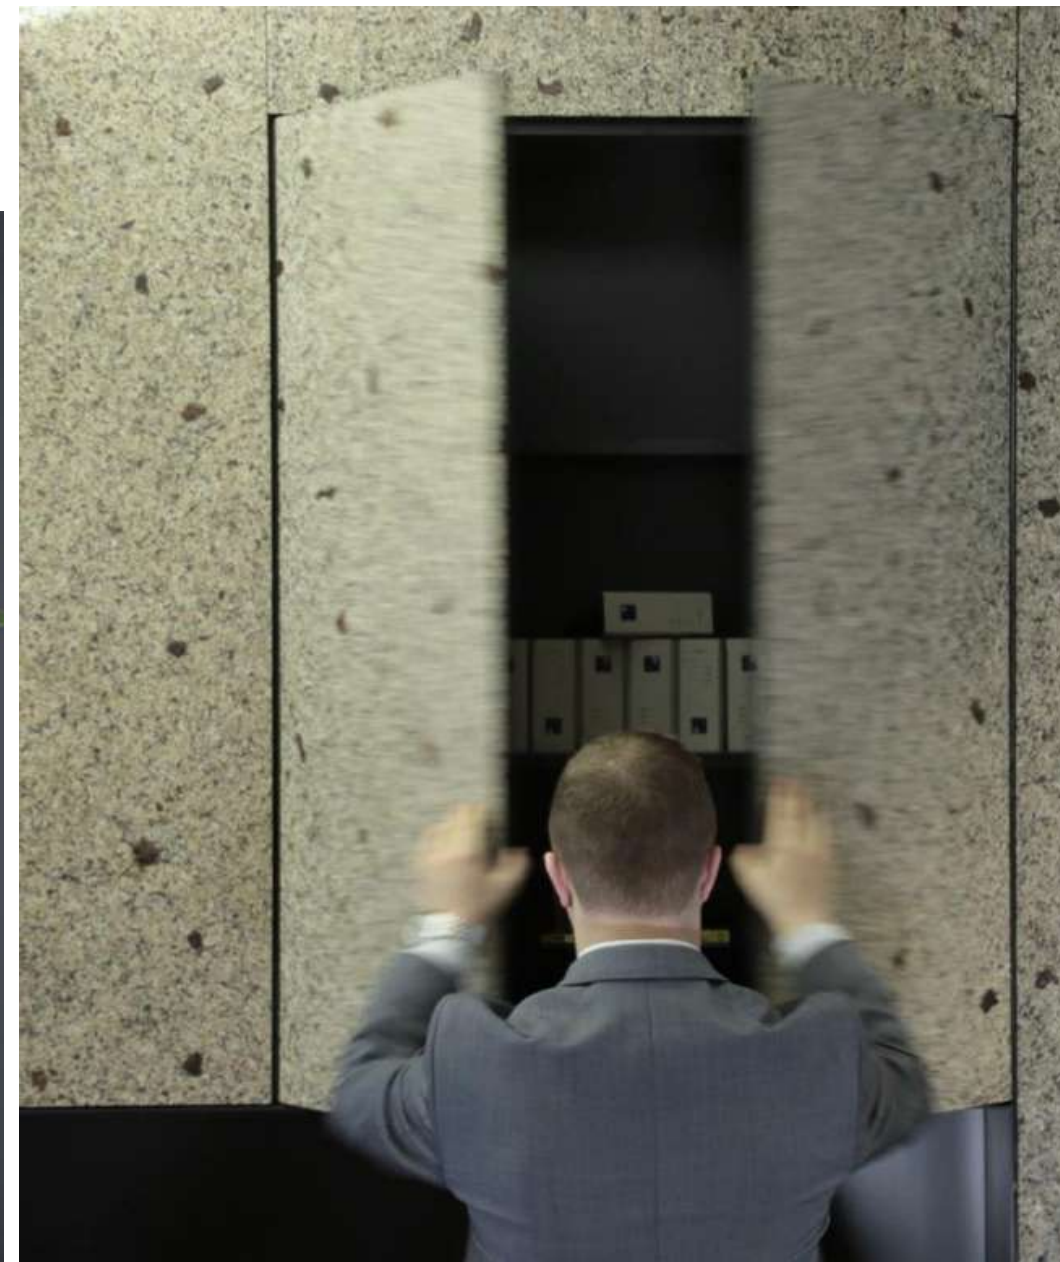

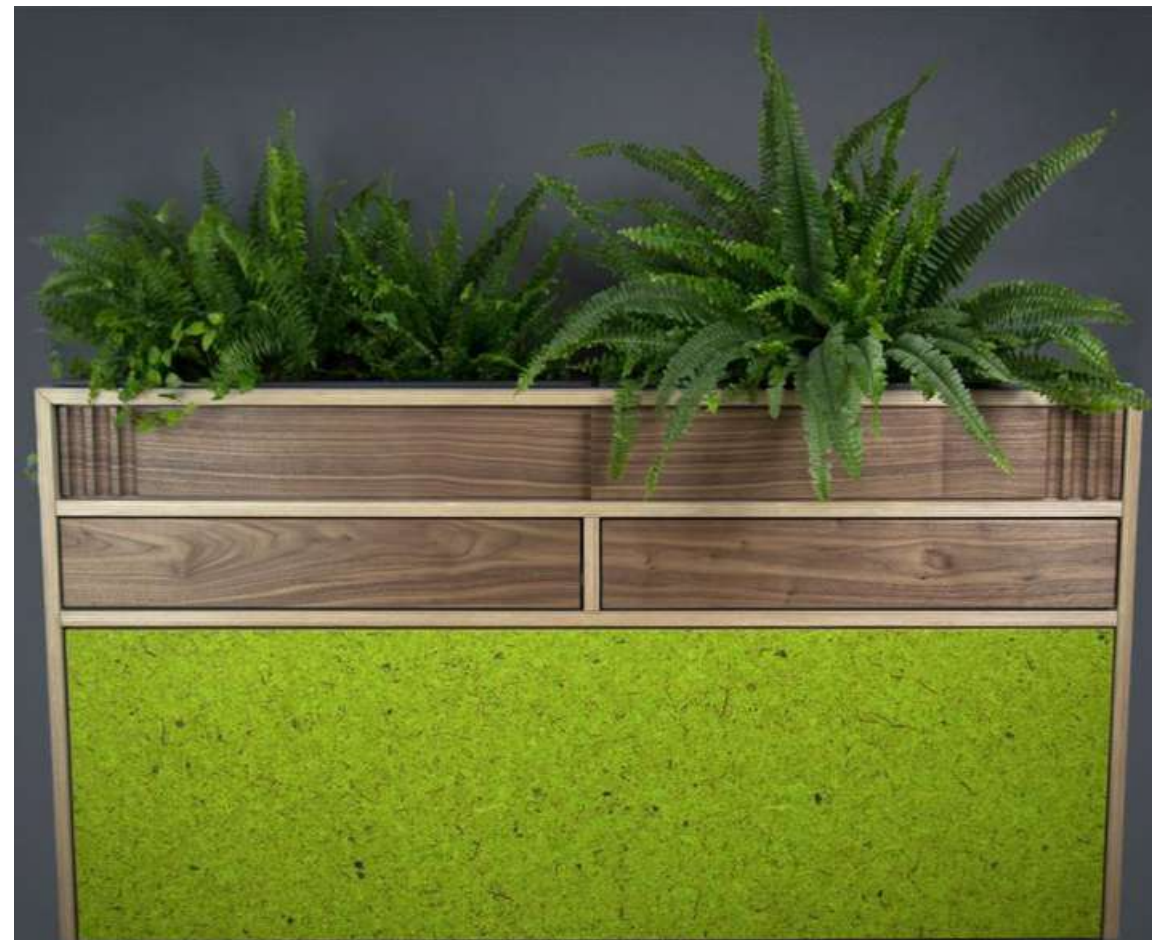

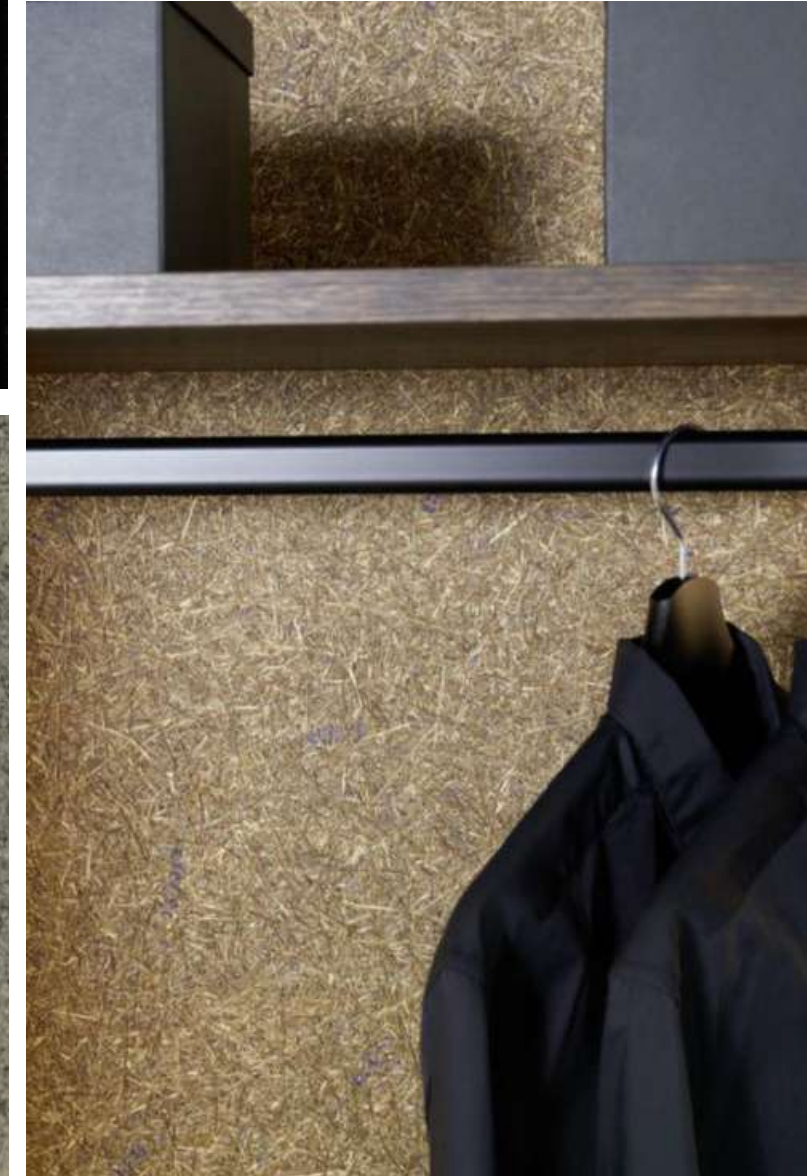

Interior design

feel-good atmosphere due to natural materials on walls, floors and ceilings

Organoid solutions
& inspirations

Organoid solutions & inspirations

100% natural flax backing

- breathable & unbleached
- allergy tested & ecological
- improves the room climate
- special lighting effects through backlighting

Flax backing self-adhesive

- PVC free strong industrial adhesive
- simple & quick installation
- ideal for subsequent refinements
- suitable for backlighting

Translucent self-adhesive

- PVC free strong industrial adhesive
- simple & quick installation
- direct application for double-sided view, e.g. for glass as room divider
- suitable for backlighting

Organoid solutions & inspirations

Flexi

- thinflexible backing
- suitable for uneven surfaces
- bending radii up to 0.5 mm

Eco-fleece white

- recycled cellulose & textile fibres
- STANDARD 100 by OEKO-TEX®
- ideal for large area applications
- Industrial Look: works best in combination with concrete, glass & steel

Golden paper

- noble & tasteful
- set special accents and highlights

HPL

- high pressure laminate/ laminate board
- format: 3050 x 1320 mm
- use for furniture elements, exhibition stand construction, shop fitting, wall and ceiling panelling

Flooring sealed with polyurethane

- glue-down or click panel
- abrasion resistance: AC3
- object class 32
- with additional sealing object class 33
- panel size: 1235 x 305 mm

A woman with long, wavy blonde hair, wearing a light pink long-sleeved shirt, is shown in profile from the chest up. She is reaching out with her right hand to touch a large, textured bale of straw. The straw is a mix of light and dark brown, with many small dark spots. The background is a soft, out-of-focus light brown. The text "Interesting facts" is overlaid in white, serif font in the center-right of the image.

Organoid in wet areas

surface sealing

You want to use Organoid natural surfaces in a splash water area or you need a high abrasion resistance?

Special effects through material density

The Organoid collection offers products with premium, medium und light material density.

Special characteristics light & medium collection: Due to the density of the raw material the backing is part of the surface design.

WILDSPITZE on flax backing
or self-adhesive
premium-density

WILDSPITZE medium
on self-adhesive
medium-density is ideal
for a room divider or for sight protection
